

## specifications

### DYN-1220

Order No: 416819

**Vacuum Motor:**

3 HP By-Pass; Continuous Duty

**Voltage:** 460 (3-Phase, 60 Hz)

**Waterlift:** 78"

**CFM:** 180

**Sound Level:** 68dB

**Inlet:** 2"

**Capacity:** 9 Gal Collector Pan

**Filter:** 13 Sq Ft MicroClean

### DYN-2220

Order No: 457620

**Vacuum Motor:**

(2) 2.3 HP, By-Pass;

Intermittent

**Voltage:** 115

**Waterlift:** 97"

**CFM:** 200

**Inlet:** 2"

**Capacity:** 9 Gal Collector Pan

**Filter:** 13 Sq Ft MicroClean

### DYN-2320

Order No: 458651

**Vacuum Motor:**

(3) 4 HP By-Pass; Intermittent

**Voltage:** 115

**Waterlift:** 75"

**CFM:** 280

**Inlet:** 3"

**Capacity:** 9 Gal Collector Pan

**Filter:** 13 Sq Ft MicroClean

The Dynavac®'s are designed for the removal of fine abrasive dust such as concrete without a premature filter clogging while returning clean air back into the workplace.

The fiberglass housing is non-corrosive, dent and rustproof, perfect for any rugged environment. The low inlet and counterbalanced base ensures the vacuum will never tip over. The external filter shaker keeps the filter clean resulting in minimal filter maintenance.

The state of the art filter system is rated at 99.9% efficient @ .5 microns. There are no bags or pre-filters required, saving you money. The collector pan slides out easy from under the vacuum for quick disposal of debris.

The continuous duty vacuum is virtually maintenance-free, our unique multi-stage turbines offer more suction using less horse power than that of any other vacuum blower on the market.
