

specifications

Motor:
1 1/2 HP, 120V 60-Cycle; 66
Frame Permanent Magnet,
DC Rectified for AC Operation
Gears: 3 Idler
Power Cord:
50 Ft., 14/3 Wire Grounded,
Safety Yellow
Transport Wheels: 5"

MTS-17E (379727)
Current: 13 AMPS
Brush Size: 17"
Brush Speed: 190 or 320 RPM

MTS-20E (379735)
Current: 13.5 AMPS
Brush Size: 20"
Brush Speed: 190 or 320 RPM

MTSV-17E (340022)
Current: 13 AMPS
Brush Size: 17"
Brush Speed: 160 to 320 RPM

MTSV-20E (335444)
Current: 13.5 AMPS
Brush Size: 20"
Brush Speed: 160 to 320 RPM

specifications

MWB-90 (307262)
Motor:
120 Volt, 1/4 HP 60 Cycle
Watts: 192
Current: 1.6 AMPS
Brush Speed: 1075 RPM
Cleaning Path: Up to 6"
Wheels: 4" Non-Marking
Power Cord:
25 Ft 3 Wire Grounded
Safety Yellow

Optional:
Flex Drive (314501)
Uses 6" to 6.5" pads

Dual / Variable Speed

Designed for a dual purpose, these floor machines are a practical and economical approach when looking for the most versatile use of floor cleaning equipment.

Scrub floors at the lower speed and spray buff floors at the higher speed with the flip of a switch or turn of a dial.

All steel triple planetary gear system, permanently lubricated with a specially designed flex coupler to guard against possible motor damage when under load.

Equipped with flexible dual triggers for left or right hand operation that are non-conductive and have built-in safety lockouts to prevent accidental startup.

The heavy-duty switch is set in a die cast aluminum switch box that won't chip or rust.

Reinforced cast aluminum apron housing for added strength and rigidity. Designed to shield the transport wheels, protecting them from damage.

The non-marring rubber bumper prevents damage to furniture and walls.

MTS-Dual Speed

The dual speed operates at 190 RPM for scrubbing and 320 RPM for polishing or spray buffing. Flip the toggle switch conveniently located on the switch box to change brush speed.

MTSV-Variable Speed

The speed of this floor machine can be adjusted from 160 RPM to 320 RPM by simply turning the dial located on the motor canopy. This enables the operator to select the speed required for the floor maintenance task at hand.

MWB90 Scrubber / Edger

The MWB90 cleans in small and hard to reach areas. It operates in the horizontal and vertical position to clean edges, grout, baseboards, under furniture and into corners.

The three-way vertical brush operates left, right and center with lockable brush alignment.

Independent dual trigger controls for left or right hand operation have protective shields to prevent accidental startup.

Equipped with a positive non-slip cog belt and pulley drive system for long life.

Handle is fully adjustable and stores in the upright position.

The vertical 8" brush includes a permanently mounted 6" cylindrical sectional brush, 3" polyester upper section and lower 3" Tynex section. The 2" removable bottom section is tynex.

The optional flex drive turns the edger into a mini scrubber/buffer with a pad speed of 1075 RPM, accommodating a 6" diameter floor pad. This is perfect for buff or scrub hard floor surfaces in and around elevators, obstructions, and other small areas.
