

STRIKER

AUTOMATIC SCRUBBER

Total Control Steering System

Controls are clearly illustrated and at operators fingertips.

Easy access to batteries and solution tank.

The Striker brings a new level of efficiency to the automatic scrubber market with its oversize 40 or 60 gallons solution and recovery tanks.

You keep scrubbing longer with fewer delays for emptying and refilling of tanks, providing up to 100% productivity gain.

The articulated steering system (bends in the middle) dramatically increases maneuverability, improves handling and allows for 150° of turning freedom with 100% water pickup.

Total control zone steering system is designed with a steering wheel for easier

operation and decreased operator fatigue.

The wide four wheel base provides increased traction and stability unlike conventional casters units. Four wheels, no casters to damage floor surface.
