

Simply Sanitized

DS7 Commercial Steam Vacuum

Steam Powered Clean.

Introducing the DS7 Commercial Steam Vacuum.

High performance and large capacity distinguish the DS7 Commercial Steam Vacuum as an excellent commercial cleaning machine.

The simple principle of steaming and vacuuming in one integrated operation provides superb cleaning, sanitizing and pickup results.

Even the most stubborn dirt dissolves easily with less detergent, utilizing germ killing steam instead. The powerful 3 PSI suction vacuum then makes for a fast and dry pickup.

DS7 can even be used as an environmentally safe alternative to pesticides in some pest control applications.
