

P307A Professional Grade Dry Backpack Vacuum

Compact and lightweight, this backpack is designed for the operator's comfort. Ergonomically designed back rest with lumbar support reduces back fatigue especially over extended periods of operation.

Vacuum carpeted and hard surfaces areas—under public seats, in restrooms, along corners, edges and tight spaces quickly and easily.

Four layer filtration system and dual cell noise filters maintain maximum cleaning efficiency, reduced noise level and a clean air environment.

Features:

Tank and Frame

Ergonomic Lumbar Support Frame is designed for comfortable use with padded adjustable shoulder straps and kidney belt. Molded high-density polyethylene tank with cord wrap won't dent and is corrosion resistant.

Motor and Filter

Molded screw-on top ensures a positive vacuum seal and easy access to the filter and 120 Volt 1.5 HP motor.

Top Fill Design

Reduces clogging and allows the filter bag to reach maximum fill capacity.

Four layer Filtration System

Consists of micro cloth, micro bag, motor filter, and dual cell noise filter to maintain maximum cleaning efficiency, clean air environment, and reduced noise level.

3-to-1 Stretch Hose

Expands 6 feet and will not hinder operation. Easy to attach and remove from the vacuum top.

14" Dry Tool Kit Includes:

- Probe HEPA Filter
- 3-1 Stretch Hose
- (2'-6") Aluminum Wand
- Crevice Tool
- Upholstery Tool
- Carpet Tool
- Round Dusting Brush
