# Mastercraft® SV-240/280

## Features and Specifications

Heavy-duty construction with a welded steel chassis that is mounted on a structural foam housing, provides added durability and strength; yet they are lightweight (under 75 lbs.) with excellent maneuverability.

Equipped with a heavy-duty dust retentive cloth outer filter bag and large 1.2 bushel capacity disposable paper filter bag.

The L-shape/low profile is designed to clean around and under furniture with wrap around bumper to protect walls and furniture from damage.

Chevron pattern brush with four rows of bristles is designed for grooming. Dirt and debris is moved towards the center, while the “no-fling” brush barrier contains and directs the dirt and debris into the oversized vacuum inlet for maximum pickup.

Chrome plated steel handle folds down for convenient storage and quick transport.

The unit’s pile height adjusts to five settings allowing for maximum cleaning efficiency.

Top-fill system assures maximum performance and pickup, while the 3.5” inlet eliminates clogging at the intake.
